

Consultation on mobile network coverage in Thorner

It has been ten years since the Parish Council consulted on the provision of mobile network coverage in the village. In that time, the coverage in the village has improved, however there may be room for further improvement as some parts of the village appear to have better coverage than others.

As such, Thorner Parish Council would like to know how you feel about mobile network coverage, and would like to identify which networks are most commonly used. This information will inform the parish council; should there be a strong opinion within the village that signal coverage could be improved, the council can use this data to lobby the network operators' planning teams.

Please can you return the following survey to the boxes in the shop, deli and pubs. Feel free to submit one each, or one for your household together. This form can be downloaded from www.thorner-parish-council.org.uk.

I am... Responding personally Responding on behalf of a household

Mobile network coverage in the village is...

Very poor Poor Average Good Excellent

I have a mobile phone or 3G/4G device and use the network provider...

O2 (Tesco Mobile, Giff Gaff, Virgin, etc) Vodafone EE/BT Mobile Three

Which of the following statements matches your opinion on network coverage?

- I/we would like mobile network coverage to improve in the village.
- I/we think mobile network coverage is fine and doesn't need improving.
- I/we are worried about the health impact of any equipment that may be needed to improve network coverage.
- I/we are worried about the aesthetic impact of any equipment that may be needed to improve network coverage.
- I/we don't care about mobile network coverage.

What best describes the part of the village that you live in?
